

March 30, 2020

To our valued customers:

**We are open for business and taking this health issue seriously.**

Due to the coronavirus – Covid 19, we are all now operating in an environment where no one wants to see the virus spread further or impact our communities. We recognize the health and safety of our community is a top priority.

While our locations are generally not a high traffic area, we have implemented additional precautions and protocols to ensure our support to you and your business remains uninterrupted. To achieve our high quality of service and supply of products and consistent access to our staff and technical support team, we are proactively doing the following:

1. Practicing social distancing, orders MUST be called in ahead of time to they can be ready upon arrival.
2. Implementing a sanitation program in all branches
3. Enhancing our internal office and staff disinfection and hygiene protocols
4. Monitoring our supply chain and maintaining strong inventory levels to ensure product supply
5. Reviewing delivery and shipping protocols to make it safe and easy as possible for products to be delivered to you.

We look forward to working together and doing our part to ensure we can all confidently continue developing our businesses and support all our customers through this time.

If you have any questions or support needs on this and issues, please contact anyone of us at our office.

Sincerely,

**Aggressive Pump & Supply Inc.**
